# Триггеры сборки

Trigger builds remotely (e.g., from scripts)
GitHub hook trigger for GITScm polling
Запускать периодически
Запустить по окончанию сборки других проектов
Опрашивать SCM об изменениях

#### Среда сборки

Delete workspace before build starts
Use secret text(s) or file(s)
Add timestamps to the Console Output
Terminate a build if it's stuck
With Ant

## Шаги сборки
